The Chevrolet Red "O. K. That Counts" Tag Protects Your Used Car Purchase

Used car buyers in this community have learned that they can have perfect confidence in any used car that has attached to its radiator cap the Chevrolet red "O. K. that Counts" tag.

Every reconditioned car we offer for sale is identified by means of this red tag attached to the radiator cap. This tag is the purchaser's assurance that the car to which it is attached has been gone over carefully by expert mechanics-that it has been thoroughly reconditioned—and that the price is based on the car's actual ability to render service.

Due to the overwhelming popularity of the new Chevrolet Six in this community, we have on hand at this time an unusually large group of these "O. K.'d" cars. If you are in the market for a dependable used car-come in. You are certain to find the car you want-at a price that will positively save you money. Make a small down payment and drive the car away-balance on easy terms.

When thieves pick out the homes of the judge of the court of common pleas and the mayor of the city from which to steal porch furniture. It looks a lot like a deliberate attempt to show especial scorn for the law.

Senator Burah came out for the debenture. But, so far as that goes, it was a cinch that he would just as soon as there was an apparent majority in the senate against it. That's the Hou. Bill's pet system. The Chicago police are hunting for a youth

who shot and killed a traffic policeman who

placed him under arrest for driving against a red traffic light. No danger of a lamentable happening like that around here. A woman sufferer from the effects of wearing too many clothes is being treated in a New York hospital. There is little occasion

for fear that her trouble will become epidemic

there or olsowhere.

A member of the Wisconsin legislature has offered a resolution that the assembly of that state request the federal government not to send federal officers into the state to enforce the prohibition law for the reason that the people of the state want their liquor. That's about what the Fouth said concerning slavery.

The Rockefeller foundation last year expended \$21,690,738 in practical and experimental medical and goveral health work, and It is fairly safe to say that it was just about the lest-invested money of the twelvemonth. Its work of philanthropy easily outranks that

It seems to be the fate of the Englishspeaking people to be ruled by minorities. The Labor party of Great Britain polled only about one-third the total vote cast at the recent election, and a handful of obstructionists in the senate stem to be running the country over here.

A Disgrace to Civilization.

A large element of the people of the state of Virginia, already greatly wrought over the slaying of the seventeen-year-old Abingdon student, J. W. Kendrick, has become still further aroused by the killing at Covington, In that state, of two brothers, Albert Graham aged twenty-two, and Thomas Graham, aged diffeen, by Special Deputy Sheriff Lloyd Rose, a volunteer dry law enforcer. What makes the dry law killings in Virginia more horrible in contemplation is that the most of them -there have been twenty-two in all-were the results of the iniquitous graduated fee system with which that state is cursed.

Under the Virginia system, the use of volunteer enforcers is permitted, their pay running from \$10 for each charge lodged against an offender to \$50 for the capture of moonshiner at his still. There is also a fee of \$25 for each still taken, even though the owner is not apprehended. Some of the volunteer enforcers are making from \$100 to \$150 a week in fees.

Hose, who is held for the murder of the two Grahams, has explained the slaying by stating that he emplied his gun at the two brothers because of his belief that they meant effect the release of an aged man whose strest as the suspected owner of a large still meant substantial fees for himself and a fellow-deputy, William Otten.

The slayings of young Kendrick and the two Grahams are the more atroclous for the reason that they were committed in direct violation of the orders of Attorney General John R. Eaunders, of Virginia, who is in tharge of state prohibition enforcement.

"I have cautioned the officers in this department time and time again." Attorney General Saunders said in a recent letter sus-Dending a state agent charged with the murder of a citizen, "against the reckless use of frearms, and have repeatedly expressed the opinion that it is very much better for an officer to permit a man who is violating the law to escape rather than to shoot him."

But in spile of this and other warnings. this special deputy that and killed the two brothers because he suspected them of meaning to effect the release of a man be suspected of being the owner of a still. In a word, he took the lives of the two brothers because he suspected them of meaning to do him out of

English-Speaking Accord.

Just two things are lacking to make practically certain the fruition of the very strongly intimated plan of Premier Ramsay Mac Donald, of Great Britain, to come to the United States to discuss with President Houser a greater degree of disarmament and closes relations between his country and ours. One is a formal invitation by President Hoover, and the other, the acceptance of the invitation by the Britist premier.

Since it has become known that the disussed visit of the premier is a strong probability, the British press has disclosed that Mr. Mac Donald, in this respect, would be arrying out a plan formed by his predecessor. Stanley Baldwin, a plan so well guarded that t was not known even to some of the latter's most intimate personal friends.

If the recent Conser: ative government rec agnized the wisdom of the plan, it is easy to understand how it would appear with far more force to the present Labor government. since both the new premier and Arthur Henderson, secretary for foreign affairs, are strong champions of closer Angio-American relations, both of them believing, as was so well expressed by the London mouthplace of Labor, the Star, that the long, undefended frontier between Camada and the United States should extend across the Atlantic. The British press and men high in the

councils of Britain manifestly favor such a conference as is indicated to be a probability of the not far distant future. At the time of this writing, official Washington was maintaining slience on the subject, but the intimation that the British premier had in mind a visit to this country for the purposes stated seemed to have struck a popular chord. Many men in public life and many representative newspapers of the country had spoken favorably of il. There is always the possibility that the

result of such a meeting as this under discussion would be negative. It is even possible that it might do more harm than good, but such an outcome as the latter must be held highly improbable. That more satisfactory results may be attained in any siluation by across-the-table discussion than by correspondence is almost inevitable. The written word, in cases such as the present. can never bring so quickly or so satisfactorily the result sought as a face-to-face discussion. There are so many more chances for emisunderstanding and misapprehension in the former method than in the latter.

The present is a critical period, for more reasons than one, in world affairs. If the two great English-speaking nations, which we believe may be held the Iwo greatest nalians of the world, can be brought into closer accord, there is for greater chance for world peace and far less chance for world misunderstanding than there would be otherwise. With the two nations acting as one for reduced expenditures for armaments and world peace, there could hardly be any obstacle in the way of these two ends too great in he overcome.

Dr. Louis E. Bisch, referred to in a New York despatch as "an eminent neuropsychiairist," says this is notalke era of 'flaming youth," but rather the era of the "Haming parent," and he points to a recent survey of the country to show parents are to he blamed for the capriciousness of youth for the reason that they neglect their children for pleasure at the time-their offspring are heart-hungry. The pendulum of scientific opinion seemingly has swung to the acquittul of youth and the indictment of parenthood.

The old-lime movie, "The Birth of a Nation," which was barred during the Willis and Donahry administrations, but enjoyed a long run during the Cox administration, has agula been barred, the state director of education rejecting it "because race prejudice might be aroused by its exhibition." We can commend the director for barring it, but sardly for the reason assigned by him. It's fault in our eyes would be that it is most decidedly punk.

because he has anything against tebacco, but rather because of the "orgy of buncombe, quackery and downright falsehood and fraud as now marks the current campaign promoted by certain eightet manufacturers to create a vast noman and child market for the use of their product." Many of the lundificate, however, are kind enough to express their apprepriation of my effects to keep them well. You will recall that the central theme of every one of theme articles is how to avoid sickness. It is the business of the family doctor to treat the sick. I can conceive it to be my job to do the best I can to keep you from illuess.

But the particular thing I have in mind today is to lind out how many people never have aches and pains. I should really like to hear about this. If somebody should read these lines who is uever sick, who never has a headache, a toothsche or a buckache, pleuse well and tell me about it. At the same time, please be good enough to tell me will you think you have been so well.

UNION AGAINST WAR

The development of President Hoover's plan looking toward further naval disarmament will be gravely regarded by the world. The president, in this, as in other matters of serious import to the nation, advances, if not new thought at least new variant of thought, in connection with the controversy which to date has led to little of practical international expression and value. international agreement and value, In this contemplation President Hoover turns

In this contemplation President Hoover turns unturally to Britain. He is aware that in any proposal or union against war, or looking toward the control of war's agencies, Buitain and America must be worthless. He is aware that an agreement between Butain and America to limit armament, or to join in an effort for the maintenance of world peace, would represent an influence against which no ordinary antagonism could prevail.

But great as would be a consummation so splendid, it necessarily could not proclaim the rediing of bunan conflict. The Bishop of Plymouth at the Plymouth celebration of Memorial day very truly said:

New York, June 22—It is always a bit of a mystery why so many weer inemselves out beauty success in New York when they get iso livile out of it. Aside from the flash of feeting fame, their lives are depressingly drab. I think especially of Earl Carroll, the young theatrical producer.

His career was temporarily clouded by a tragic incident, but he returned to old scenes to salvage new triumphs. Already he has rolled up a sizable tortune. ong ten' and their brokers temporatily on the side lines and many of the public traders out of the running for various purposes, the stock market appears to hare entered the doldrums a little ahead of the last two years.

Bethlelsem was the leader in the advance in the steel stocks, with a two-point more to 102.

Most of the jubblic utility stocks were ready to continue the upward more which has been in progress a week or two. American Waterworks topped the list with a new 4 1-2-point jump to 130 1-2, which is approximately double its early 1920 price. Findic Service of New Jersey and Standard Gas broke all past records when the former sold at 85 and the latter at 102. Offerings Well Taken

With the probabilities in favor of vote on the farm bill by the senate some time during the afternoon, there some time during the afternoon, there was no disposition to sell wheat and the market met with little pressure, save for acattered offerings which caused a lower opening. These were well taken by commission houses and when shorts covered and fair commission house buying continued, the market acted tight, advancing steadily. Strength at Winnipeg was 4 factor.

Crop. pars. was little changed main.

Strength at Winnipeg was a factor.
Crop news was little changed, mainly streaming the favorable and improving conditions. Rains in the Northwest overnight caused some of the opening selling. Broundail's foreign crop, summary was generally (avorable and further rains were received in Argentina.

Export demand was better, with Export demand was better, with sales in all positions estimated at 500,000 hu, mostly Manitobsa. Of this total, Russells reported, 200,000 hu, was add to Shanghai and more (estimated as high as 600,000 hu,) was wanted by the same buyers. Later wires confirmed sales of 1,000,000 hu, to the Orient.

Foreign consumption is continuing

oreign consumption is continuin at the same record breaking pace it has maintained all season, Broomball stated. Bradstreet's available supply compilation showed a world decrease of 5,499,000 hu.

compilation showed a world decrease of 5.490,000 hu.

Canadian statistics were more favorable, with a decrease of 5.213,000 hu, in the visible. Country marketings so far this season have been 464.221,000 bu, a year ago, yet the visible supply in that country is only 20,000,000 more than a year ago.
